2.	Institution Name	Healthcare Institution 'Novopolotsk City Central Hospital', Novopolotsk Nursing Hospital
3.	Actual and registered address, phone, fax, e-mail	211443, Novopolotsk, Vitebsk Region, Republic of Belarus 4 Gaidara str. e-mail: ncgb@ncgb.by 80214506211 (fax) 80214506270 (phone)
4.	Information about the Institution	The Novopolotsk Central City Hospital is a large multidisciplinary medical facility comprising nine healthcare organizations, 14 specialized inpatient departments, and 10 support services. The hospital houses five inter-district departments (ophthalmology, orthopedics and traumatology, urology, infectious diseases, and surgery), as well as computed tomography and magnetic resonance imaging units and a department palliative care and nursing care facilities. There are two inter-district centers for managing acute coronary syndrome (ACS) and acute cerebrovascular accidents (ACVA), as well as two prenatal diagnostic units (based at the women's health clinics of Polyclinics No. 1 and No. 4) that provide

		specialized medical care to ten districts of the Vitebsk region, serving a total population of approximately 450,000. Each year, the inter-district departments treat over 7,000 patients, representing nearly 28% of all inpatient cases. Modern diagnostic and treatment methods have been implemented in traumatology, ophthalmology, gynecology, endoscopy, laboratory diagnostics, and CT and MRI imaging. More than 20,000 people receive care at the hospital annually.
5.	Head of institution	Head Physician of Healthcare Institution “Novopolotsk City Central Hospital” – Shemenkova I.G.
6.	Project manager	
7.	Previous aid obtained from other foreign sources	
8.	Sum required	200000,00 (66000) (\$)
9.	Co-financing	-
10.	Project terms	During 2027-2028
11.	Project purpose	Living space arrangement serving to create favourable conditions for disabled people, establishing safe environment without barriers in Novopolotsk Nursing Hospital.
12.	Project objective	Improving the quality of life of the elderly and people with disabilities in the Novopolotsk Nursing Hospital by creating comfortable living conditions for patients
13.	Detailed description of activities under the project according to the objectives set	Target group: elderly people and persons with disabilities residing at the Novopolotsk Nursing Care Hospital; Number of participants: 70; Person in charge: I.G. Shemenkova. Expected results: The acquired equipment and the reconfiguration of the space to accommodate the needs of people with disabilities will significantly ease their daily routines, improve their quality of life, create comfortable living conditions, and help eliminate existing disparities in the living environment at the Novopolotsk Nursing Care Hospital.
